BuySellManga POS

Getting Started Guide

One register for your counter — and your online sales.

For used book, manga, and comic shops. Powered by Stripe.

What this is

BuySellManga POS is a point-of-sale built for buy/sell/trade shops. The inventory on your register is the same inventory listed for sale on BuySellManga.com and BuySellComic.com — list a book once, and it can sell at your counter or online to buyers across the country. A sale anywhere takes it off the shelf everywhere, automatically.

Your shop runs on your own Stripe account. You are the merchant of record, payouts land in your own bank account, and BuySellManga never holds your money.

What it costs

Item	Cost
Card processing (in person)	Stripe's standard 2.7% + 5¢ per tap/insert — paid to Stripe
BuySellManga POS fee	$0.55 flat per in-person transaction — the same 55¢ on a $6 book or a $60 book
Monthly subscription	None. No platform fees. No contract. You only pay when you sell.
Counter terminal (optional)	Stripe WisePOS E — $249 one-time
Online marketplace sales	13% seller fee on BuySellManga / BuySellComic — the standard fee for every seller

Example — a $20 sale at your counter: Stripe takes $0.59, BuySellManga takes $0.55, and $18.86 settles to your Stripe account for payout to your bank.

Before you start — what to have ready

- Your business name and address (exactly as they appear on your tax records)
- Your EIN, or your SSN if you are a sole proprietor
- Your business bank account and routing numbers (for payouts)
- A government-issued photo ID (Stripe verifies every account — this is a federal requirement for payment processors)
- Wi-Fi at your counter, and access to your email

The whole setup takes about 15 minutes, and pilot shops are set up personally by our team.

Step 1 — Connect your Stripe account

We email you a secure setup link. It opens Stripe's own hosted onboarding — you will never type banking details into our website. Enter your business details, tax ID, and bank account, and finish Stripe's identity check. When you are done, your shop has its own Stripe account, connected to BuySellManga POS. Already have a Stripe account? Use the same email and the connection is added under your existing login.

Step 2 — Order your terminal (optional)

The counter terminal is the Stripe WisePOS E — an all-in-one Android terminal with a touchscreen, built-in card reader (tap, insert, and swipe), and receipt printing. It is $249 one-time, ordered through your Stripe setup. You can also start without hardware: your inventory can sell online on the marketplaces while your terminal ships.

Step 3 — Set up your terminal and the POS app

When the WisePOS E arrives: charge it, connect it to your shop Wi-Fi, and power it on. The BuySellManga POS app runs right on the terminal. On your setup call we pair the reader to your shop, sign you in, and run a test transaction together so you see exactly how a sale, a refund, and your payout work before your first real customer.

Step 4 — Load your inventory

List each book or comic once — search the BuySellManga catalog, set your price and condition — and it appears both at your register and online. Buy a collection over the counter? Add it the same way, and it is selling in both places before it hits your shelf. Sell a volume at the counter and it comes off the online listing automatically: no double-selling, no second system to update.

Step 5 — Take your first sale

Ring up items on the terminal, take the card (tap or insert), and you are done — Stripe processes the payment on your account, the 55¢ POS fee is applied automatically, and the inventory updates everywhere. Receipts can be emailed or printed from the terminal. Refunds are issued from the terminal or your Stripe dashboard, and your daily totals, fees, and payouts are always visible in your Stripe dashboard.

Questions shops ask us

- **When do I get paid?** Stripe pays out to your bank on its standard payout schedule. Your money is never held by BuySellManga.
- **I already use Stripe. Can I keep my account?** Yes — connect with the same email and the POS runs under your existing Stripe login.
- **What if I want to stop?** Anytime. There is no contract and no cancellation fee. Your Stripe account, your payouts, and your customer data are yours.

- **What does the 55¢ cover?** The point-of-sale platform and the two-storefront inventory sync — and it is the only fee we charge. No monthly bill, ever.
- **Do I need the terminal to sell online?** No. You can sell on BuySellManga.com and BuySellComic.com today with no POS and no hardware — list at buysellmanga.com/sell.
